**Project Overview:**

**Project Name:** AI FAQ Assistant

**Project Description:** An intelligent conversational AI assistant designed to automatically answer frequently asked questions (FAQs) for users with high accuracy.

**Project Version:** v1.0.0

**Testing Period:** September 30 to October 05

**Testing Scope:**

- NLP intent recognition and query matching accuracy.
- Response latency and fallback mechanisms for unknown queries.

**Testing Environment:**

URL/Location: <https://ai-faq-assistant-demo.internal> / Staging Server 02

Credentials (if required): uat\_tester\_01 / Pass@12345

**Test Cases:**

| TestCaseID | TestScenario                                                | TestSteps                                                                            | Expected Result                                                      | Actual Result                                   | Pass/Fail |
|------------|-------------------------------------------------------------|--------------------------------------------------------------------------------------|----------------------------------------------------------------------|-------------------------------------------------|-----------|
| TC_001     | Verify AI assistant correctly answers standard FAQ queries. | 1. Open chat interface<br>2. Type "What are your business hours?"<br>3. Submit query | Bot should output correct business hours within 2 seconds.           | Bot responded with accurate hours in 1.2s.      | Pass      |
| TC_002     | Test handling of out-of-scope or ambiguous questions.       | 1. Open chat interface<br>2. Type complex unrelated query<br>3. Check response       | Bot should trigger fallback message politely explaining limitations. | Triggered polite fallback message successfully. | Pass      |

**Bug Tracking:**

| Bug ID  | Bug Description                                                    | Steps to Reproduce                                                                         | Severity | Status | Additional Feedback           |
|---------|--------------------------------------------------------------------|--------------------------------------------------------------------------------------------|----------|--------|-------------------------------|
| BUG_001 | Minor UI text overlap on small mobile screens during rapid typing. | 1. Open mobile view<br>2. Type multiple questions quickly<br>3. Observe chat bubble layout | Low      | Closed | Resolved in latest CSS patch. |

**Sign-off:**

**Tester Name:** Alex Morgan

**Date:** September 30

**Signature:** A. Morgan

**Notes:**

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
